

SAP Consulting Implementation & Management

In 2016, Devterra, through its partner solutions program, ventured into building a team of highly experienced SAP accredited consultants to meet the high demand for SAP resources globally. Our focus is to deliver quick and reliable implementations that are carefully engineered to suit our clients' business needs. The team collectively brings over 100 years of experience working with SAP and are up to date and experienced in all SAP modules and SAP/ASAP implementation methodology.

The ASAP 8 Standard takes a disciplined approach to project management, organizational change management, solution management, and other disciplines applied in the implementation of SAP solutions. Built around the SAP Advanced Delivery Management model, it supports project teams with a series of resources, creating a comprehensive platform to streamline the implementation, upgrading and enhancement of SAP software.
